Higher Power Output

- Higher module conversion efficiency benefit from bigger wafer and half-cell structure.
- MBB(busbar) technology enhance stronger current collection with lower series resistance.
- Reduce losses of current mismatch.

Excellent Temperature Coefficient

- Higher power yield with lower operating temperature coefficient.
- Enables better output in hot weather conditions.
- Better performance in weak light conditions.

Higher reliability

- Positive loading 5400 Pa on front side and 2400 Pa loading on back side.
- Split-type junction box design to guarantee reliability and safety during project operation.
- Excellent anti-PID performance to guarantee safe and reliable operation in extreme weather condition.

Lower Hot Spot and Crack Risk

- Reduce hot-spot risk with optimized electrical design and lower operating current.
- Crack risk limitation with help of MBB solar cell design.
- Better anti-shading performance.

Performance Warranty

12 Year Product Warranty · 25 Year Power Warranty

From the 2nd year to the 25th year, the average annual power decline will be no more than 0.55%.
